

# Honeyaid®

Recommended by the queen of bees

## Extension Set "Propolis"

Modification for filling liquids, e.g.:

- ✓ Propolis
- ✓ Honey, mead

Main field of application: filling of container sizes from 2 to 1,000 ml

Art. 30206900

### Customer benefit

Efficient, precise and flexible filling with fast and uncomplicated product change

### Operating conditions

|                            |                      |
|----------------------------|----------------------|
| Hours of operation per day | 8                    |
| Days of operation per week | 5                    |
| Ambient temperature        | 10°–40°C / 50°–104°F |

### Technical data

|                             |   |                               |
|-----------------------------|---|-------------------------------|
| Height under filling nozzle | 10–235 mm   |                               |
| Weight                      | 12.7 kg (without power supply)  |                               |
| Dosage with step size       | 0.1 g<br>1.0 g  | 0.1–49.9 g<br>50.0–32,500.0 g |
| Filling accuracy            | Maximum 1% deviation  |                               |
| Maximum suction lift        | 500 mm (optionally expandable to 1,500 mm)  |                               |
| Maximum volume flow         | Accessory kit ø 6.4 mm:<br>Recommended dosage:  | 2,000 ml/min<br>100–1,000 ml  |
|                             | Accessory kit ø 3.2 mm:<br>Recommended dosage:  | 550 ml/min<br>20–200 ml       |
|                             | Performance range adjustable by selection of different hose sizes. As a general rule, the smaller the diameter, the slower but more accurate the filling. |                               |
| Filling temperature         | 2°–95°C   |                               |

### Triggering of the filling process

- Foot switch
- Frame switch (included with the Honeyaid bottling machine)
- Sensor (optional for operation with turntable)

### Automatability

Yes

### Compatible with

Honeyaid Filling Machine
