

# Honeyaid®

Recommended by the queen of bees

## Extension Set "Royal"

Modification for the dosed filling of viscous products into small containers, e.g.:

- ✓ Royal jelly
- ✓ Creams

Main field of application: filling of container sizes from 10 to 100 g

Art. 30502900

### Customer benefit

High-precision and effective dosing of products that are difficult to fill by hand

### Operating conditions

Hours of operation per day	8
Days of operation per week	5
Ambient temperature	10°–40°C / 50°–104°F

### Technical data

Footprint	Width 350 mm × depth 350 mm	
Height under filling nozzle	10–170 mm	
Dosage with step size	0.1 g	0.1–49.9 g
	1.0 g	50.0–32,500.0 g
Filling accuracy	Maximum 1% deviation	
Maximum suction lift	n.a.	
Maximum volume flow	500 ml/min	
Filling temperature	2°–95°C	

### Triggering of the filling process

Microswitch (included with the Honeyaid bottling machine)

Food switch (optional)

### Automatability

n.a.

### Compatible with

Honeyaid Filling Machine
